

welcome to sparkit

Thank you for your interest in SPARKIT™, a new and exciting line of professional cold spark machine consumables. We are thrilled to unveil our high-quality titanium alloy powders and granules to the industry.

our concept

The concept behind SPARKIT™ is to provide venues with an alternative source of high-quality aftermarket cold spark grains, complete with the necessary RFID time cards. This approach eliminates the need to rely on purchasing manufacturers' consumables, which are often overpriced or frequently out of stock.

why choose us?

All our granules have been extensively tested in nearly all popular brands of cold spark machine to ensure compatibility. Furthermore, every batch of SPARKIT™ granules undergoes rigorous testing for spark density, burn rate, and any moisture content. Only granules that pass all testing parameters are sent through to packaging. This continuous batch testing guarantees a clean, consistent, and brightly lit spark column every time.

special offer for valued clients

For our highly valued clients currently using our pro line of atmospheric effect fluids, we are pleased to offer discounted prices on select SPARKIT™ part numbers. The special pricing will be emailed to you in a separate email. This is our way of thanking you for being a loyal customer! We are confident that you will find SPARKIT™ consumables to be as good as, or even better than, those from OEM manufacturers. You won't be disappointed.

questions?

If you have any questions, you can find most answers, along with Safety Data Sheets (SDS) and other useful content, on our website: www.sparkitusa.com. Should you have a specific inquiry, feel free to reach out!
